1953 Annual Report

To the Shareholders of the BOSTON and MAINE RAILROAD

In 1953 operating revenues of your company amounted to \$88,871,371 and operating expenses were \$71,599,177. While operating revenues decreased 1.1%, operating expenses decreased 1.3%.

Net revenue from operations plus other income was \$18,315,385. Tax accruals, interest and rentals reduced this amount to \$2,898,861 income after all fixed charges. In accordance with terms of mortgage indenture there has been allocated \$679,102 for redemption of Series R. R. bonds, \$1,015,383 interest on income bond Series "A" and \$482,870 for sinking fund for redemption of Series "A" bonds.

After payment of fixed and contingent charges there remained for corporate purposes \$721,506 for the year 1953 as compared to \$183,324 in the year 1952.

CAPITAL STOCK MODIFICATION

In April of 1953, the Interstate Commerce Commission issued its final order in the stock modification case. This authorized the plan to become effective in accordance with the commission's earlier approval which had been extended in 1951. As of the close of the year 268,165 shares of the 5% new preferred, or 97.4%, and 515,747 shares of new common stock, or 94.3%, had been exchanged. A dividend of \$6.45 a share on the new preferred stock covering accumulations from January 1, 1949 to January 1, 1953, was paid on December 30, 1953. The total dividend payment was \$1,775,659.20.

BOSTON and MAINE RAILROAD

CHANGES IN LONG-TERM DEBT

Long-term debt outstanding in the hands of the public on December 31, 1953, amounted to \$84,215,007 of which \$7,302,707 represented equipment obligations. This was a reduction of \$4,096,746 as compared to December 31, 1952.

Changes in the long-term debt during the year occurred as follows:

REDUCTION IN AMOUNT OF DEBT IN HANDS OF PUBLIC

Funded Debt reacquired:	
Series RR 1st Mtge. 4% Bonds due 7/1/60.	\$ 674,000
Series A Income Mtge. 4½% Bonds due 7/1/70	\$1,075,000
Vt. Valley RR 1st Mtge. 4% Bonds due 10/1/55	\$ 37,000
<hr/>	
Net reduction in funded debt	\$1,786,000
Equipment obligations discharged during the year	\$3,255,951
Less equipment obligations added on account of new equip- ment acquired	\$ 945,205
<hr/>	
Net reduction in equipment obligations	\$2,310,746
Total reduction in long-term debt in hands of public	\$4,096,746

TAXES

Railway tax accruals amounted to \$7,008,495 in 1953 as compared to \$8,323,979 in 1952. How taxes were paid is indicated in the following table:

	1952	1953
State and Municipal Taxes	\$2,944,032	\$2,988,678
Federal Payroll Taxes, Railroad Retirement	2,697,050	2,653,593
Federal Payroll Taxes, Railroad Unemployment Insurance	217,660	212,900
Federal Income Taxes	2,423,640	1,146,080
Other Taxes	41,597	7,244

During the year the railroad successfully concluded litigation started in 1945 with respect to its income tax liability for the years 1939-1941 inclusive. As a result the railroad will receive a refund of taxes and interest previously paid amounting to \$1,637,099, with additional interest to January 31, 1954 amounting to approximately \$330,000. Of these amounts \$925,000 was included in income, netting after taxes \$489,138. The remainder of this refund is set up as a reserve for possible tax deficiencies for years 1942 to 1953.

1953 Annual Report

RETURN ON INVESTMENT

The net return on the investment in the property for 1953 was 2.2%. A comparison of results of operations for the years 1949 through 1953 is shown below:

	1949	1950	1951	1952	1953
Operating Revenue	\$82,238,981	\$86,580,762	\$88,419,714	\$89,852,218	\$88,871,371
Operating Expense	67,091,573	66,816,462	71,807,912	72,543,616	71,599,177
Net Operating Revenue . .	\$15,147,408	\$19,764,300	\$16,611,802	\$17,308,602	\$17,272,194
Deductions:					
Tax Accruals	\$ 6,481,146	\$ 8,576,442	\$ 7,710,137	\$ 8,312,158	\$ 6,996,675

Investment in Transpor- tation Property includ- ing cash, materials and supplies, less recorded depreciation	\$254,040,311	\$256,572,127	\$252,963,510	\$256,034,088	\$248,676,951
Rate of Return	2.0%	2.7%	1.9%	2.0%	2.2%

FREIGHT TRAFFIC

Freight revenue for the year was \$67,435,450, an increase of 0.9% over 1952. There was a decrease of 4.1% from the previous year in revenue ton-miles, while revenue per ton-mile increased 5.2%.

After running slightly behind the volume of the previous year during the first few months, the traffic volume strengthened during the summer but that was, in turn, followed by a decline in the fall, with a rather pronounced weakness in the last two months of the year. The decline in our eastbound movement was due almost entirely to a reduction in the volume of all-rail coal. The weakness toward the end of the year was caused by a general decline in business activity throughout the country and was accentuated by the slow movement of the 1953 Aroostook County potato crop due to an unfavorable market price situation. The loadings of freight locally on the Boston and Maine held up well throughout the year.

Resumption of construction work at the Newington, N. H. Air Base late in 1953 is expected to give the railroad a substantial amount

BOSTON and MAINE RAILROAD

of traffic in 1954. This is also true of certain other large construction activities, such as the hydro electric project of the New England Electric System near Littleton, N. H., which will not be completed until the middle of 1956. The railroad has moved and is moving a large volume of steel and other materials used in the construction of the Boston Central Artery as well as other projects in this area.

PASSENGER TRAFFIC

Passenger revenue for the year was \$11,396,879, 4.7% less than in 1952. The number of passengers carried was 10.6% less than a year ago. Passengers carried in other than commutation service decreased by 8.1% while the number of commutation passengers was 12.4% less than in 1952.

In November the supervision of passenger service was, for the first time, separated from the general traffic department and placed under the direction of Vice-President R. M. Edgar, with full responsibility for all passenger matters and with full authority to take such steps as are necessary to develop a more favorable passenger operation. The objectives will be to improve equipment, schedules and service where such action can increase use of our trains and to eliminate those services which are slightly used and operate at a loss. This is a long range effort to eliminate or reduce the substantial passenger deficit which has offset, to a large degree, for many years, our profitable freight operations.

In December a major revision in the commutation fare schedule was approved by the Massachusetts Public Utilities Commission and the Interstate Commerce Commission. The new basis of fares has as a principal objective increased use of passenger train service between Boston and points beyond the immediate suburban commuter zone. The schedule also placed fares on consistent mileage scales and resulted in some increases within 13 miles of Boston. Within Massachusetts a rate increase of 25% was granted, instead of a greater increase which had been sought, on pupils' fares which had been previously maintained at 50% of the monthly ticket rate.

Budd rail diesel cars were being used to operate 38 train schedules at the end of the year.

1953 Annual Report

MILK TRAFFIC

Revenue from milk and cream in 1953 was \$1,348,834. This is a decline of \$5,374 or 0.4% under 1952 and can be attributed to the traffic lost during the 19 days of the Rutland strike during the summer. All of this traffic returned to the rails after the Rutland resumed operations. The volume of milk and cream shipped was slightly higher than in 1952 and it is evident that our competitive situation with respect to highway carriers has been stabilized.

EXPRESS TRAFFIC

Revenue from express was \$1,912,381, an increase of 5.4% over 1952. This continued improvement in express revenue was due to an increase in rates of about 15% made effective August 20 on interstate and September 8 on intrastate business, and an increase in volume resulting from the change in federal postal laws effective in 1952 limiting the size and weight of parcel post shipments. Serious attempts are being made by some interests to have Congress repeal the 1952 law and restore the previous size and weight limits in parcel post service. This is being vigorously resisted by the Railway Express Agency and the owning carriers.

During the year the railroads of the country negotiated a new agreement of operations with the Railway Express Agency. This agreement has been signed by your railroad and becomes effective on March 1, 1954, replacing the present operating agreement which now exists between the Agency and the railroads.

OPERATING RESULTS

Gross ton miles produced per freight train hour reached a new record high at 39,761 or 1% more than last year's record figure and the average speed of freight trains maintained the high average of the year 1952.

Since August, 1953 all freight train service has been operated by diesel power. At close of 1953, 74% of all passenger train miles were

BOSTON and MAINE RAILROAD

operated by diesel locomotives, 15.6% by motor rail cars, and only 10.4% by steam locomotives, all in suburban service.

All yard switching service at the close of the year was performed by diesels.

THE MYSTIC TERMINAL COMPANY

An increase of 81% in gross tonnage handled by the Mystic Terminal Company over 1952 occurred during the first full year of operation at the new Mystic Pier No. 1, which opened in August 1952, and the first year of operation of both new Hoosac and new Mystic together.

Mystic Pier No. 1, Hoosac Pier No. 1 and the supporting Hoosac Grain Elevator, in addition to old Mystic Piers 48, 49 and 50, use and occupancy of the latter being continued on a temporary basis, comprise

1953 Annual Report

the marine properties leased by the Boston and Maine Railroad from the Commonwealth of Massachusetts and operated by the Mystic Terminal Company.

Approximately 454,000 gross tons of cargo, including grain, were worked at all facilities in 1953 as compared with 249,000 gross tons in 1952. This is an increase of 205,000 gross tons, and was accomplished in spite of the absence of Pier 48 during the last six months of the year due to fire damage. Carload traffic handled by the railroad at its waterfront facilities during 1953 amounted to 8,533 cars of which 5,925 were in Boston and Maine road haul.

In the light of experience gained there is every reason to feel that, if water traffic holds up as anticipated, maximum usage of the facilities can be achieved.

ABANDONMENTS AND DISCONTINUANCES

The railroad continued to stress in 1953 the elimination of little used services which had been operated for some time at out-of-pocket losses.

In November 1953, the Interstate Commerce Commission and the New Hampshire Public Utilities Commission jointly heard this company's petition for the abandonment of 37 miles of railroad between Plymouth and Blackmount station in the town of Haverhill, in New Hampshire. This was the most important case involving discontinuance of service during the year. Passenger and freight service local to the line is very light and has been declining for several years. Other traffic can be handled adequately by other Boston and Maine Railroad lines contiguous to the territory. The case was pending at the close of the year.

In other cases, passenger service was reduced under authority of the New Hampshire Public Utilities Commission to a single round trip of service on weekdays on the line between Concord and Portsmouth and Concord and Claremont in New Hampshire. In both cases the

BOSTON and MAINE RAILROAD

remaining passenger services were being operated at out-of-pocket losses at the close of the year and preparations were under way to seek complete discontinuance.

Lesser economies were accomplished throughout the system by discontinuance of agencies and retirement of little used station facilities.

WAGES AND WORKING RULES

During the year 1953 there were many changes in the working rules and wage agreements affecting our employees.

In March, the referee appointed by the President of the United States in December, 1952, having ruled earlier that the United States government wage stabilization policy would permit "productivity increases," awarded operating and non-operating employees four cents per hour "improvement factor" in basic wage rates, retroactive to December 1, 1952.

In June, basic hourly rates of pay for freight carmen represented by the Brotherhood of Railway Carmen of America were increased four cents as a result of a national wage movement by that organization to equalize the rates of freight and passenger carmen.

The moratorium provisions in existing agreements with various operating and non-operating organizations, which had helped to stabilize conditions since 1951, expired on October 1, and in anticipation of this date the fifteen non-operating organizations served demands on May 22nd for more favorable arrangements with respect to vacations, paid holidays, life, health and accident insurance and pass privileges. Counter proposals were served by many carriers. On December 28, President Eisenhower appointed an emergency board under the provisions of the Railway Labor Act to consider this dispute with the non-operating organizations.

On October 1, the operating organizations presented their requests for wage increases of approximately 30%, and further requested that the cost-of-living adjustment clause be eliminated and the amount included in the basic rates.

Agreements have been reached with the organizations representing conductors, trainmen, firemen and hostlers, that, effective December 16, the cost-of-living adjustment will be included in the base rates, the

escalator clause cancelled, and a wage increase of five cents per hour given to these employees. In addition, employees with fifteen years' service are to be given three weeks' vacation, effective with the calendar year commencing January 1, 1954.

A similar "package settlement" has been offered to the engineers but has not been accepted as yet.

LAND DISPOSITION AND INDUSTRIAL DEVELOPMENT

The sale of land not required for railroad purposes has been very closely tied for many years to industrial development on our lines and to projects related to community betterments in the public interest or to private sales of importance to the economic and social life of the territory served.

This program was actively progressed in 1953 resulting in 90 sales of land involving 6,500,000 square feet. Thirty-five of these sales were made to industries for new plants or additions to existing buildings. Twenty-three sidetrack projects involving 11,500 feet of trackage were completed. It is estimated that freight traffic approximating 12,000 cars a year will result from these activities.

The industrial development of the large areas of land adjacent to the railroad's yards in the Rutherford Avenue district of Charlestown, Mass., is now under way. Four new buildings are under construction or on contract.

The railroad is making every effort to cooperate with municipalities, industrial foundations and others in efforts to have available space utilized by industries which will provide traffic for our lines as well as promote interests of the communities.

CHANGES IN EQUIPMENT

During the year considerable progress was made in the improvement of the railroad's property and equipment. This is a two-way process involving the retirement of the old and acquisition of new.

Thirty-three units were added to the railroad's diesel locomotive fleet. At the end of the year the railroad owned 233 diesel locomotives

BOSTON and MAINE RAILROAD

of all types with 33 additional power units. Eleven others were ordered during the year for delivery in 1954. Seventy-one steam locomotives were retired during the year reducing the number of steam locomotives owned to 95.

Important changes also occurred in car equipment. The total number of passenger cars owned at the end of the year was 856. The railroad acquired six of the new self-propelled rail diesel cars, increasing to nine the number of cars of this type now operated. Four new sleepers were ordered for 1954 delivery to be utilized on the railroad's overnight service between Maine and New Hampshire points and New York and on the service between Boston and the Maritime Provinces. Ten coaches were purchased and nine Pullman sleepers acquired for conversion to baggage cars. During the period 173 passenger cars were withdrawn from service of which 165 were retired and six converted to non-revenue use. Two were destroyed on other railroads.

Revenue freight car ownership at the end of the year was 4,745. This was 21 less than a year ago.

1953 Annual Report

FREIGHT CAR PER DIEM AND MILEAGE COSTS

Effective August 1, 1953, the per diem rate for use of freight cars was increased from \$2.00 to \$2.40. The Boston and Maine Railroad, and certain others, believe this amount is greatly in excess of the cost of owning and maintaining freight cars. Nevertheless the books of this company have been maintained in a manner which reflects the \$2.40 rate, thereby substantially increasing the net debit per diem balance as compared to 1952. Your company has declined to pay the increased rate, however, until proper ownership cost has been determined by the Interstate Commerce Commission which now has the question before it. Initial hearings have been held and a finding is expected in 1954. This matter is a serious one for the Boston and Maine Railroad because it is a terminating carrier and, of necessity, has more foreign cars on line than can be loaded off-line. For this reason, any increase in the per diem rate will adversely affect this company's net income.

A related problem is the rate of mileage payments on refrigerator cars. The rate was higher during the whole year of 1953 than in 1952. This, together with heavy potato traffic in the early months of the year, caused substantially increased mileage payments which added still more to the cost of car hire for the year.

MATERIALS AND SUPPLIES

Government controls over materials and supplies, as well as controls over inventory and prices, were discontinued during 1953. Prices of materials and supplies, principally steel products, continue to move to higher levels. The weighted average of prices of all materials, exclusive of fuel, increased approximately 3%.

Further increases in production capacity of industry during the year made materials more available and resulted in improved deliveries.

BOSTON and MAINE RAILROAD

Diesel fuel oil was available in ample supply throughout the year and purchases totaled 25,312,342 gallons at an average price of 10.0 cents per gallon. This compares with 24,714,271 gallons used in 1952 at an average price of 9.78 cents per gallon.

Locomotive coal purchased during the year amounted to 69,000 net tons at an average cost f.o.b Boston and Maine Line of \$7.98 per ton. This compares with 99,500 net tons in 1952 at an average cost of \$7.93 per ton.

The total cost of materials and supplies purchased in 1953, including fuel, crossties, and lumber, but excluding equipment purchases, was \$10,384,247, compared with \$11,488,490 in 1952.

ADDITIONS AND BETTERMENTS

The year 1953 was a particularly active one for the engineering department which was concerned with changes in roadway and track, the signal and communications system, and miscellaneous facilities both from the point of view of improvements and betterments and retirements which would result in savings or operating economies.

Seventy-one single track miles were resurfaced with stone ballast on the Portland, Fitchburg and Terminal divisions. An additional 6.6 miles were gravel ballasted between Brattleboro and Putney, Vt., on the Connecticut River line.

The rail detector car used in annual tests to reveal hidden defects covered 1,499 track miles of main lines and important branches during the year.

Under the blanket retirement program 107 items of structures valued at \$350,399 and 68 segments totalling 12.47 miles of track valued at \$137,505 were retired during the year. Numerous other retirements incidental to construction projects involving structures and signals, and major retirements handled separately for approval of expenditures involved, were effected.

Three grade crossings were eliminated during the year due to construction of new overhead bridges or the closing of highways and a number of other improvements accomplished.

Automatic crossing protection signals were installed at 14 points on the system while equipment was improved or modernized at 25 other crossings.

1953 Annual Report

Forty-one improvement projects in freight and passenger yard facilities to improve operations or for the comfort and convenience of employees or patrons were completed.

Improvements were completed in shop facilities and engine terminals at 32 points while improvements to station and office buildings were accomplished at 42 points.

Seventy-six purchases of new major work equipment were made during the year while 55 replacements were made.

PROMOTIONAL ACTIVITIES

The Boston and Maine Railroad has actively cooperated with state, regional and community agencies in the promotion of all-season recreational developments.

BOSTON and MAINE RAILROAD

Its Sunday Snow Train which operates between Boston and New Hampshire's Eastern Slope Region during the skiing season is nationally known. It carried 8,827 passengers in 1953. In addition the railroad offers special services in excursion and package form to those who prefer other areas which can be reached by regular trains. The railroad's booklet "Winter in New England," of which 60,000 copies are distributed annually, is known as a directory of winter fun in Northern New England.

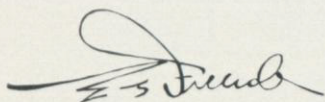

The railroad has produced motion pictures in color and sound which deal with the four New England seasons and the industrial activities of the territory. These films have been shown in every state in the United States and in some of the Canadian Provinces.

In 1953 The Boston and Maine Railroad cooperated in the development of an extensive community relations program developed by the Eastern Railroad Presidents Conference. As a part of this members of the railroad family, nominated by department heads, completed a course in railroad economics and public speaking at Boston University. These graduates are in great demand as speakers at service club and community meetings at which the railroad story of progress and improvement is told. Some of these speeches have received nation-wide press attention.

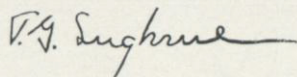

The Boston and Maine Magazine, published six times a year, is distributed to about 18,250 employees and friends. It stresses news of our employees and significant railroad problems.

Improvement of equipment and service to the end that revenues may be increased and elimination of slightly used and costly services to the end that expenses may be reduced are the chief problems confronting the railroad as it moves into 1954.

The Board of Directors and Officers appreciate the support and cooperation of all employees and the confidence of patrons during the year.
